

Medical Cannabis at a Glance

Cannabis (also known as “marijuana”) is a plant made up of numerous medicinal compounds. Research investigating medical applications of cannabis suggests that cannabis therapy may be an effective tool for assisting individuals in managing a variety of symptoms related to chronic and debilitating conditions.

Some conditions and symptoms for which cannabis may offer relief include:

- Chronic pain
- Fibromyalgia
- Headache
- Sleep disorders
- Irritable Bowel Syndrome
- Muscle spasms & stiffness
- Crohn’s Disease
- Epilepsy
- Nausea
- Loss of appetite
- Multiple Sclerosis
- GI Symptoms
- Post-Traumatic Stress Disorder

If you are unsure if your patient may be eligible for medical cannabis treatment, contact us today for more information. Through our physician-directed education programs GrowWise Health is able to provide you with access to the latest research in medical application of cannabis, as well as expert knowledge of experienced physicians.

GrowWise Health Services for Physicians

In collaboration with our Medical Advisory Board, GrowWise Health offers physician-directed education training aimed at providing you with the necessary tools to assess your patient for cannabis treatment. Our comprehensive program adheres to CPSO and CFPC standards and reflects the most up-to-date best practice guidelines. All of our education materials are developed under the direction of expert physicians and physician focused legal advisors.

This training includes:

- Patient assessment package including assessment protocol
- Access to the latest research in the field
- Patient follow-up care package
- Authorization for medical cannabis forms
